Abstract:

Media information is a means to convey a message or information that we can receive both spoken and written, and various kinds such as newspapers, television, radio, and computers. Information plays a very important for human life. Information needed is information that must be very fast, accurate, and accountable authenticated by many, especially among people for business, entertainment, and various other information. The Internet is a global collection of (global) network of thousands of computers and millions of personal computers that run independently. Internet easy to use by anyone, even those who only have a minimal capacity. Web is an information delivery using Internet technology. With the web, we can interact in a vast space. Until now, the website is very popular, but its use required a design.
